<b>Preface</b>	<b>7</b>
<b>Summary: WIT report 2004</b>	<b>9</b>
<b>I Imaging</b>	<b>13</b>
• <b>2D-CRS stack: A comparison between the extended and global search strategies . . .</b>	<b>15</b>
<i>G. Garabito and W. Paschoal</i>	
• <b>A global optimization algorithm applied to the CRS problem . . . . .</b>	<b>26</b>
<i>M. Salvatierra, F. Yano, L.T. Santos, J.M. Martínez, R. Andreani, and M. Tygel</i>	
• <b>CRS-attribute-based residual static correction . . . . .</b>	<b>36</b>
<i>I. Koglin and E. Ewig</i>	
• <b>CRS-stack-based seismic imaging for rough top-surface topography . . . . .</b>	<b>49</b>
<i>Z. Heilmann and M. von Steht</i>	
• <b>2D CO CRS stack for top-surface topography . . . . .</b>	<b>63</b>
<i>T. Boelsen</i>	
• <b>2D CO CRS stack for ocean bottom seismics and multi-component data . . . . .</b>	<b>77</b>
<i>T. Boelsen and J. Mann</i>	
• <b>The effect of event consistent smoothing on CRS imaging . . . . .</b>	<b>90</b>
<i>T. Klüver</i>	
• <b>Dip-correction for coherence-based migration velocity analysis . . . . .</b>	<b>98</b>
<i>R. Biloti and J. Schleicher</i>	
• <b>Filling Gaps in Ray Traveltime Maps . . . . .</b>	<b>110</b>
<i>C. Vanelle</i>	
• <b>Minimum-aperture Kirchhoff migration using CRS attributes . . . . .</b>	<b>114</b>
<i>C. Jäger</i>	
• <b>Fresnel-Volume migration of elastic seismic data . . . . .</b>	<b>127</b>
<i>S. Lüth, A. Goertz, S. Buske, and R. Giese</i>	
• <b>Image-wave remigration in elliptically isotropic media . . . . .</b>	<b>131</b>
<i>R. Aleixo and J. Schleicher</i>	
• <b>Modified Kirchhoff prestack depth migration using the Gaussian Beam operator as Green function – Theoretical and numerical results . . . . .</b>	<b>140</b>
<i>C. A. S. Ferreira and J. C. R. Cruz</i>	
• <b>Traveltime-based true-amplitude migration . . . . .</b>	<b>149</b>
<i>C. Vanelle, M. Spinner, T. Hertweck, C. Jäger, and D. Gajewski</i>	
• <b>Traveltime-based anisotropic migration with angular parametrisation . . . . .</b>	<b>164</b>
<i>T. Kaschwich, C. Vanelle, and D. Gajewski</i>	
• <b>Reverse modelling for seismic event characterization – A new tool for passive seismology</b>	<b>172</b>
<i>D. Gajewski and E. Tessmer</i>	

• <b>CRS data imaging: a case study for basin reevaluation</b> . . . . .	190
<i>L. Leite, Z. Heilmann, I. Koglin, M. von Steht, and J. Mann</i>	
<b>II Rock physics and waves in random media</b>	203
• <b>Numerical considerations of fluid effects on wave propagation: Influence of the tortuosity</b> . . . . .	205
<i>E. H. Saenger, O. S. Krüger, and S. A. Shapiro</i>	
• <b>Reflection coefficients of fractured rocks: A numerical study</b> . . . . .	213
<i>O. S. Krüger, E. H. Saenger, and S. A. Shapiro</i>	
• <b>Stress sensitivity of seismic and electric rock properties of the upper continental crust at the KTB.</b> . . . . .	219
<i>A. Kaselow, K. Becker, and S. A. Shapiro</i>	
• <b>Deep seismic imaging in the presence of heterogeneous overburden: Insights from numerical modeling</b> . . . . .	226
<i>M. Yoon, S. Buske, and S. A. Shapiro</i>	
• <b>A comparison of seismic attributes</b> . . . . .	236
<i>V. Grosfeld and L. T. Santos</i>	
<b>III Modeling</b>	241
• <b>Quadratic normal moveouts in isotropic media: a quick tutorial</b> . . . . .	243
<i>M. Tygel and L. T. Santos</i>	
• <b>2.5D Acoustic Finite-Difference Modeling in variable density media</b> . . . . .	255
<i>J. Costa, A. Novais, F. de Assis Silva Neto, and M. Tygel</i>	
<b>IV Other topics</b>	265
• <b>Characterization of hydraulic properties of rocks using probability of fluid-induced micro-earthquakes</b> . . . . .	267
<i>S. A. Shapiro, S. Rentsch, and E. Rothert</i>	
• <b>Location of seismicity: a migration based approach</b> . . . . .	278
<i>S. Rentsch, S. Buske, S. Lüth, and S. A. Shapiro</i>	
• <b>Localization pitfalls of seismic events due to anisotropy – A KTB real data case study</b>	285
<i>K. Sommer, D. Gajewski, and R. Patzig</i>	
<b>The Wave Inversion Technology Consortium</b>	295
<b>WIT research personnel</b>	297
<b>List of WIT sponsors</b>	303
