| Preface | 9 |
| Summary: WIT report 2012 | 11 |
| I Imaging | 15 |
| • Extension of the i-CRS operator to converted waves | 17 |
| <i>A. Bauer, B. Schwarz, C. Vanelle, and D. Gajewski</i> | |
| • A new stacking operator: i-CRS with 4 parameters | 34 |
| <i>M. Bobsin, D. Gajewski, B. Schwarz and C. Vanelle</i> | |
| • Migration velocity analysis with diffraction events using residual moveout: Application to SIGSBEE 2B data | 45 |
| <i>T.A. Coimbra, J.J.S. de Figueiredo, J. Schleicher, A. Novais, and J.C. Costa</i> | |
| • Offset-Continuation stacking | 59 |
| <i>T.A. Coimbra, A. Novais, and J. Schleicher</i> | |
| • Recovering diffractions in CRS stacked sections | 73 |
| <i>J.H. Faccipieri, D. Rueda, L.J. Gelius and M. Tygel</i> | |
| • High-resolution imaging of diffractions - a steered MUSIC approach | 81 |
| <i>L.-J. Gelius, M. Tygel, A.K. Takahata, E.G. Asgedom, and D.R. Serrano</i> | |
| • Diffraction travelt ime approximation for general anisotropic media | 94 |
| <i>A. Pronevich, S. Dell, B. Kashtan, D. Gajewski</i> | |
| • A regularized filtering approach to 2D deconvolution of prestack depth migrated seismic images with the use of resolution functions | 106 |
| <i>A.K. Takahata, L.-J. Gelius, R.R. Lopes, I. Lecomte and M. Tygel</i> | |
| • True-amplitude Kirchhoff depth migration in anisotropic media: the travelt ime-based approach | 120 |
| <i>C. Vanelle and D. Gajewski</i> | |
| • Estimation of anisotropy parameters with the i-CRS operator | 130 |
| <i>C. Vanelle, K. Sager, B. Schwarz, B. Kashtan, and D. Gajewski</i> | |
| II Modeling | 143 |
| • On the Helmholtz decomposition in weakly anisotropic VTI media | 145 |
| <i>R. Bloor, J. Schleicher, L.T. Santos, and J.C. Costa</i> | |
| III Full waveform inversion | 159 |
| • 3D elastic full waveform inversion of small-scale heterogeneities in transmission geometry | 161 |
| <i>S. Dunkl, A. Kurzmann and T. Bohlen</i> | |
| • Can we ignore P-wave velocity in full waveform inversion of shallow seismic Rayleigh waves? | 173 |
| <i>L. Groos, M. Schäfer, T. Forbriger and T. Bohlen</i> | |

| | |
|--|-----|
| • 2-D elastic full waveform inversion for a transmission experiment in crystalline rock – a synthetic study | 181 |
| <i>S. Heider, S. Jetschny, R. Giese, and T. Bohlen</i> | |
| • Scattering-based decomposition of sensitivity kernels for full waveform inversion – part 2: perturbation estimates with adjoint kernels | 189 |
| <i>D. Macedo, I. Vasconcelos, and J. Schleicher</i> | |
| • A parameterization study for acoustic full waveform inversion | 203 |
| <i>A. Przebindowska, A. Kurzmann, D. Köhn, T. Bohlen</i> | |
| • Testing point source to line source transformations for application of full waveform inversion to shallow seismic surface waves | 220 |
| <i>M. Schäfer, L. Groos, T. Forbriger, T. Bohlen</i> | |
| IV Other topics | 235 |
| • Experimental relations between stress and fracture properties in synthetic anisotropic media | 237 |
| <i>P.E.P. Marcondes, J.J.S. Figueiredo, M.E. Far, J. Schleicher, N. Dyaur, and R.R. Stewart</i> | |
| • Structure enhancing filtering with the structure tensor | 253 |
| <i>R. Morelato and R. Biloti</i> | |
| • Seismic imaging of the dynamic water column | 267 |
| <i>C. Raub, D. Gajewski, E. Tessmer, and D. Spickermann</i> | |
| • Time-lapse seismic of the subsurface underlying a dynamic ocean | 281 |
| <i>M. Werning and D. Gajewski</i> | |
| The Wave Inversion Technology Consortium | 301 |
| WIT research personnel | 307 |
| List of WIT sponsors | 317 |
